About Me

- Highly motivated and dedicated Backend developer with a strong foundation in Python and Django framework. I have nearly 2 years of experience in designing robust, detail-oriented systems. My commitment to excellence is underscored by a passion for clean code, systematic problem-solving, and meticulous documentation. As a minimalist with an eye for aesthetics, I approach development with a creative perspective, ensuring that every project I undertake is not only technically good but also visually satisfying. My career goal is to transition into a DevOps engineer role, where I can streamline development pipelines and enhance system reliability.

Skills

- Python | Django | Django Rest Framework | Swagger | Celery | Docker | JWT | PostgreSQL | MySQL | MongoDB | Redis | Git | Linux
- Nginx | K8s | Jenkins | Terraform | Clouds | CI/CD | Nexus Registry | GitLab | Unit Testing | Stress Testing | Postman | Bash Scripting
- traefik | OOP | Documentation | Microservices | Backend | HTML,CSS,JS | Unity | C# | Agile/Scrum workflow

Experiences

Backend Developer | Part Time   **VisaRoads**   **Nov 2022 - Nov 2023**

- Single-Handedly build the entire phase 1 of the project in 4 month, Applying and planning Scrum/Agile workflow
